The Tobacco Institute  
Washington, D.C.

Dear Sir

Having just read your advertisement  
in today's issue of the S.F. Examiner,  
and noting my full support of your viewpoint,  
i.e., a fair and proper review of Drs.  
Auerbach and Hammond research findings in  
dogs having smoked cigarettes by an appropriate  
committee from the Tobacco Institute, I  
write asking for more of the text involved.

I feel the public in our free republic  
is entitled to hear a fair and honest  
appraisal of both sides contentions. To date  
the Tobacco Institute has been denied that  
right.

Thank you.

Gene F. Pawlick, M.D.
